

# The Platform™ v3: Now with Attack Trees to Implement Sophisticated Active Defense

# Counter Craft

Imagine being able to design state-of-the-art deception campaigns that deflect attacks and gather contextualized threat intel in minutes, simply by dragging and dropping elements into place. With CounterCraft's Version 3 release of **The Platform™**, you can do just that, making deception deployment more intuitive, user-centric and powerful than ever before.

CounterCraft **The Platform** v3 revolutionizes the way you deploy and analyze deception campaigns, thanks to more than 170 new features focused on our customers' needs and designed to actively defend their organization's cybersecurity posture. With CounterCraft's new attack trees, you can sketch and design your deception campaign by dragging and dropping hosts, services and breadcrumbs, and then deploy in a single click. It reduces threat intel analysis time thanks to the real-time graphical tracking of the attack progress. **The Platform** v3 is an enormous step forward in campaign and adversary behavior modeling. Read on to find out more about the improvements, including enhanced ActiveBehavior™ and full NIST matrix integration.

Reduce threat analysis time and defend against threats faster with real-time attack visualization.

### Powerful ease of use

Faster and more intuitive deployment of deception campaigns

### More efficient

Reduced threat analysis effort and time to mitigation

### More effective

Unparalleled deception realism that improves campaign results

### Attack trees

A revolutionary new tool

### Increased automation

Automated event filtering and built-in analysis

### Never-before-seen performance

Massive enhancements thanks to 170 new features

## Introducing ... Attack Trees, making powerful deployment simple and intuitive

**The Platform** v3 includes the addition of attack trees, which make use of the tool easy and intuitive. Attack trees mean that viewing all campaigns and activities is simple in a single pane of glass. The new interface is fully backwards compatible with existing installations.

Faster and easier deployment

Dramatically reduced ramp up and results time

Reduced analysis effort required from threat intel analysts thanks to real-time graphical tracking of attack progress

## What you get with attack trees:

- ✓ Fully interactive drag & drop design for new deception hosts, services and breadcrumbs, the building blocks of deception campaigns
- ✓ One-click activation
- ✓ Intuitive menu-driven configuration that removes complexity
- ✓ At-a-glance views of the deception attack path, components and operational status
- ✓ Easy drill down on adversary activity by event, host, service or breadcrumb with one-click access to a pre-filtered Data Explorer detailed view
- ✓ Access to the Data Explorer, notifications, other deception campaigns and all the other configuration menus from a single pane of glass

# Dramatically enhancing usability and credibility with 170 new features

In addition to the revolutionary attack trees, Version 3 comes with massive under-the-hood improvements in performance and upgrades in user experience.

### ✓ Unparalleled levels of credibility

Create custom fake users, each with a full pattern of life, with our new **Active Behavior personas**. These personas operate in your deception platform, with realistic behavior and unparalleled hands-on keyboard simulation.

### ✓ Automated risk mitigation prioritization

Identify the gaps in your existing security controls and those needed to combat real, observed adversary activity with our new **full NIST 800-53 matrix integration**, which features one-click visualization of security controls.

### ✓ Upgraded user experience

Based on customer feedback, we've incorporated over 170 new features into this new version. Improvements including code refactoring, database upgrades, and more mean better deployment management and analysis.

## About CounterCraft

CounterCraft is a software company that goes beyond detection and response to provide proactive cybersecurity solutions and detect attacks faster for the world's leading organizations. Our premier product, CounterCraft **The Platform**, consistently stops red teams, spear phishing, ransomware attacks and insider threats. This distributed deception platform is a global leader in active defense, with tooling that provides real-time intelligence and the capability to manipulate adversary behavior.

Our technology stops attackers in pre-breach recon phases, integrates contextualized threat intel with incident response workflows, and saves money and time by helping security teams prioritize their actions. Our product is used successfully around the globe by Fortune 500 companies and government organizations, including the US Department of Defense.
